Dermatology:

Can you see
how many
eggs are in the
wagtail's nest?

Invented to discover: The new DELTA 30 PRO dermatoscope.

Since the LED^{HQ} elements have been repositioned in our new high-end dermatoscope, the light reaches deeper layers of the skin. This gives an extremely vivid, spatial impression of lesions – similar to a 3D image. So even the details of the details stand out.

The HEINE colorSHIFT function is a genuine world first. It allows you to easily adjust the colour temperature to suit your own viewing habits. Go from warm white to bluish white in 4 stages.

Regardless of whether you prefer working close-up or further away, the image is always sharp and crystal clear. You can see the other ideas we've hatched at heine.com

HEINE DELTA 30 PRO DERMATOSCOPE BUNDLE SMALL

DELTA 30 PRO bundle with contact plate with scale, small contact plate, E4-USBC power supply with cable, charger 30 table charging station, universal smartphone adapter, case.

\$3,695
226186

VALUE!!

HEINE DELTA 30 PRO DERMATOSCOPE

The DELTA 30 PRO dermatoscope features significant improvements, such as rearranged LEDHQ for deeper skin illumination, colour temperature adjustment with the colorSHIFT function, and the working ring HEINE diSTANCE for lesion examination without contact. The toggle function allows for easy switching between polarised and non-polarised light, and it is compatible with almost all available smartphones for digital imaging.

\$2,995
226183

VALUE!!

HEINE diSTANCE WORKING RING

The HEINE diSTANCE working ring enables the user to examine and manage a lesion under magnification without contact. The working ring allows instruments to be inserted through its openings, lesions to be marked, foreign bodies to be removed, and more. The stable working ring maintains a constant distance, allowing for examination and management of lesions under magnification without contact.

PROJET 101 EAR IRRIGATOR

Projet 101 Ear Irrigator is designed by doctors with innovative pulsatile irrigation. Utilising the most modern production methods the Guardian Projet 101 was designed to fulfil the most demanding surgeries and hospital ward requirements for a reliable, leak-free and easy-to-use machine that is not expensive to run and does not require constant maintenance and subsequent downtime.

- Extra long mains lead and handle hose so the machine can be sited where it is most convenient
- Integral wall mount frees up valuable workspace by wall mounting the Projet™ however easily removed for cleaning etc
- The sliding flow regulator is conveniently mounted in the handle. Water flow can be temporarily stopped by sliding regulator to off position or flow regulated by sliding control to the desired position
- Ultra-thin atraumatic tips help visualisation and direction of water flow
- Digital control of water pressure and flow is easy to operate and remains constant and reproducible
- Projet 101 Ear Irrigator is designed by doctors with innovative pulsatile irrigation.
